

A.M.A. Chapter 621 March, 2005

From the President

Thanks to Chuck Tarbox for setting up last month's meeting at the Challenger Learning Center. It is amazing! The presentation by the Tour Guide was very good. It felt like we were at Huston and on a lab on the space shuttle. I think this facility is a great asset in promoting science and math to young people. I hope we get to do that again sometime.

It looks like March came in like a lion and we'll see if it goes out like a lamb. Don't forget the Static Show is scheduled for the Saturday in May, so keep working on those new models.

Hope to see you at the field soon.

Jim.

Club members enjoy a tour at the Challenger Learning Center. (more pictures of the nights event on page 4).

Club Meetings

Club meetings are held on the second Saturday of each month at the flying field in Covell, IL. Meetings begin at 7:00pm during the winter (CST) and 8:00pm during the summer (CDT).

SIRS Inc Meeting

February 12th, 2005

CALL TO ORDER:

President Jim Danforth called meeting to order at 7:45. There were 22 members present.

PREVIOUS MINUTES:

Mike Wilson read the previous minutes from the January meeting.

TREASURE'S REPORT:

Treasure Tom Kirk gave the treasure's report. Motion passed.

NEW BUSINESS:

Put together a new constitution this month for the club.

Big Bird 664 Chapter was established and approved for by the AMA for June 11th.

A request for the Museum Aviation Camp to be held at SIRS field on July 20th from 1:30-3:00.

We need 3 trainer planes available to fly and 6 members to help out.

Motion passed.

SHOW & TELL:

Duane Hollinger showed us his Reno Critical Mass aircraft that he scratch built from a scale aircraft.

ADJOURNMENT:

Meeting adjourns at 9:00pm. Motion passed

Respectfully submitted, Mike Wilson, Secretary

Duane Hollinger showed us his Reno Critical Mass aircraft that he scratch built

An inexpensive locator for models

from the Rockland County RC Club by Greg Lee

The sound generator of a musical greeting card has some specifications that make it a good locator for lost aircraft—especially electric models.

It has the following characteristics:

- 1) It only weights .2 oz or six grams.
- 2) It only requires .15 mA at 1.5 VDC. This allows a theoretical use of 2.2 years from a receiver pack.
- 3) The sound level is 55 dB at one meter—audible to the undead at 100-feet.
- 4) It is only 1 1/8-inch in diameter and 1/4-inch thick.
- 5) They only cost \$0.10 per resistor, \$0.35 per capacitor, and one servo plug.
- 6) It's simple—if it has power, it has music.

Most greeting card sound boards are powered by 1.5 VDC, but some might use three-volt-batteries. By adding a resistor you can step the voltage down for your receiver pack.

You will also need a .1 F capacitor to smooth out the pulsation from the different tones.

To calculate the values for the resistor just follow this formula below where V1= receiver pack voltage, V2= sound board voltage

I avg= is the average current (amps)

R = (V1 - V2)/I avg

example: R = (4.8 - 1.5)/.00015 R = 22,000 or the closest standard value.

CLUB VISITS CHALLENGER LEARNING CENTER

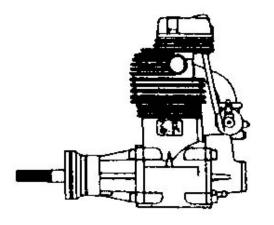

The SIRS regular club meeting for February was held at the Bloomington Challenger Learning Center. Here are some photos of the night's meeting. All photos courtesy of Karl Laun.

Fuel Orders Taken until April 30th

The SIRS Club fuel order sheet will be posted in the little club house by approximately March 19th. It is hoped that any necessary details can be finalized at the March 12th meeting. Orders will be accepted until April 30th. Fuel orders could then be picked up at the May 14th club meeting. If you have any questions about the fuel order please feel free to email Todd Guttschow at toddg@connectingpoint.com.
